

SC//PLATFORM

The Solution for C-Store and Fuel Retail Brands and Franchisees

Managing the technology to run a convenience and fuel retail business is a huge responsibility. You live in a world of applications proliferating at unprecedented speed—from core systems that run daily business operations to IoT technologies that help maximize on-shelf availability and minimize shrink, to loyalty apps that enhance customer experiences. Though many of your applications probably run in the cloud, some applications simply must run on-premises for all the obvious benefits. And that list is growing.

Customer

Connected fuel and electric vehicle tools and applications require a secure, reliable infrastructure to maximize ROI. If your C-store and fuel retail use third-party loyalty programs, IoT sensor monitoring, video surveillance security systems, fuel management solutions, POS systems, or any other connected technology for the retail shopping experience, you must ensure that sensitive data is handled securely and that critical connections are always available to keep your operations running seamlessly.

You need the freedom to run applications on-premises when you need to, with the operational simplicity and performance you get from the cloud. Scale Computing offers a powerful

solution to support all your convenience and fuel retail applications, yet lightweight enough to run on hardware suited for your store environment (not a mini-data center).

You get a highly reliable computing environment that monitors and heals itself to make sure your applications remain online and available, even during a hardware failure or disruption in connectivity, that makes it easy to connect and manage thousands of global sites in a high-performance business that is secure, reliable, scalable and cost-effective. With centralized management, you have a simple, cloud-like experience for deploying, monitoring, and maintaining distributed application infrastructure.

BENEFITS OF RUNNING ON-PREMISES APPLICATIONS ON SC//PLATFORM

SC//Platform drastically reduces your operational costs and future-proofs your on-premises technology investments.

CONSOLIDATE ON-PREMISES APPLICATIONS AND INFRASTRUCTURE

Compute, storage, virtualization, and disaster recovery are combined into a single, easy-to-use platform. Eliminate the cost and complexity of caring for separate hardware and software to support individual point solutions. Even run legacy and modern applications on the same infrastructure.

HIGH AVAILABILITY

Designed for locations with no IT staff on-site, autonomous, self-healing capabilities maximize the uptime and performance of applications. Failover, redundancy, and resiliency are fundamentally designed into every aspect of the solution to create a highly available, reliable computing environment unlike any other.

FLEXIBLE SCALABILITY

Easily scale up or down as needed with exclusively cloud-based management, including templated security and zero-touch deployment.

As demand to run applications on-premises continues to grow, your computing footprint will expand rapidly—within and across tens, hundreds, or even thousands of sites. SC//Platform is unmatched for managing and scaling application infrastructure across sites under a common platform. Deploying hundreds or thousands of nodes today grows effortlessly to tens of thousands tomorrow without rearchitecting a thing.

CENTRALIZED MANAGEMENT FOR DISTRIBUTED LOCATIONS

Centralized management provides instant visibility into your entire on-premises environment, highlighting issues that may require attention or jeopardize application availability. By remotely orchestrating software updates, hardware swaps, and new infrastructure setups, skilled technicians no longer need to go onsite to manage environments.

COST-SAVING EFFICIENCY

Remove costs from your application infrastructure every step of the way—purchase, deployment, management, and maintenance. At the same time, you maximize application uptime, use compute resources more efficiently, and drastically improve IT team productivity.

» FIND OUT MORE ABOUT SCALE COMPUTING PLATFORM

SC//Platform is your proven solution for in-store, right-sized computing. We remove the barriers to running applications where you need them by bringing the best of the cloud to your on-premises IT environment.
