

# NETWORK CONFIGURATION SERVICE

## NETWORK CONFIGURATION GUIDANCE & ASSISTANCE

Scale Computing Platform is a hyperconverged infrastructure solution that requires 1GbE or 10GbE networking.\* Whether you have the existing networking in place or are adding/upgrading networking to support your new SC//HyperCore system, the Network Configuration Service is designed to assist you.

Our knowledgeable SC//Engineer will provide guidance and configuration assistance of all switches per single cluster to ensure you are able to seamlessly connect your environment to the SC//HyperCore system. The Network Configuration Service includes knowledge transfer to make sure you not only understand the requirements for the networking installation and configuration of your SC//HyperCore system but also the best practices and considerations for future networking growth with your SC//HyperCore system.

What's Included?	Delivery	Details
<p><b>Network Pre-Planning</b></p> <ul style="list-style-type: none"> <li>• Wiring network</li> <li>• Environmental check</li> <li>• Setup network for backplane</li> </ul>	Remote Call	Language: English Only
<p><b>Network Configuration</b></p> <ul style="list-style-type: none"> <li>• Set up network for LAN and backplane</li> <li>• Remote configuration of 1GbE or 10 GbE switch(es)*</li> <li>• Configuration of switches to work within existing networking infrastructure including VLANs, Spanning, etc</li> <li>• Tree, logging, and other basic switch functions</li> </ul> <p><i>*Setup of high availability networking for multiple switches, if applicable.</i></p>	Remote Call	Service Scheduling: Monday-Friday 6AM-8PM EDST
<p><b>Questions &amp; Answers</b></p> <ul style="list-style-type: none"> <li>• Any remaining questions regarding the Network Configuration</li> </ul>	Remote Call
