

SC//PLATFORM™ FOUNDATIONS

YOUR GUIDE TO MASTERING SC//PLATFORM™ ADMINISTRATION

SC//Platform™ Foundations Training is a comprehensive, self-paced learning program designed for end users and partners to build a strong foundational understanding of the SC//Platform™ and quickly get up to speed on key features. Delivered through on-demand modules and interactive objects, this training covers technical administration of SC//Platform, deep dives into how the platform works, and best practices for virtualization, networking, disaster recovery, backup, and replication. It also includes guidance on securing and hardening Scale Computing HyperCore™ environments, along with an overview of Scale Computing Fleet Manager™ and Zero Touch Provisioning (ZTP).

The course is divided into two structured learning plans: SC//Platform Apprentice for beginners to build a foundation in the platform, and SC//Platform Master for more advanced end users looking to explore how to do more with the platform and gain a better understanding of how the platform works under the hood.

All materials are accessible online via the SC//Academy, allowing learners to progress at their own pace.
