

## Software Engineer - MEVN stack

We are looking for a self-motivated software engineer with development experience on MEVN stack. You will get to work with a collaborative and talented engineering team who pride themselves on delivering quality products to our customers on a regular basis. Your role will have a major impact on how our customers use our products.

### Key traits:

- You have the ability to pick up new concepts quickly and learn from peers.
- Write clean, highly readable and testable code.
- Have a strong preference for writing tests and testable code.
- You love to dig into unfamiliar areas and learn something new.
- Enjoy coding, building new things, and solving hard problems.
- Work well with others.

### Work Environment

We have a small engineering team, so you will have a great opportunity to make an impact on the product, team, and company. We're a very interactive group, so you should enjoy collaborative design, development, and testing.

The product consists of a wide variety of technologies. This makes for an environment where learning is core to being a successful engineer at Scale. Our team is highly motivated and experienced, and we enjoy sharing knowledge and learning from one another. Our environment is collaborative, interactive, fun, and open to improvement.

Here's a video about the engineering culture at Scale:

<https://www.youtube.com/watch?v=hxQ7b7qIWQo>

Technologies you'll have the opportunity to learn about at Scale:

- General clustering & distributed systems
- Distributed block storage systems
- Containers and virtualization
- Large scale state machines
- Linux system management
- MQTT Networks
- Cloud Hosting and Monitoring

### Requirements:

- Bachelor's degree in Computer Science or equivalent industry experience
- 4 years or more employed as a full-stack software engineer
- 2 years or more building web applications in Vue.js

- 1 year or more experience with MongoDB.
- System design skills with an understanding of testability and maintainability
- Experience using git
- Great verbal and written communication skills

Other useful skills/experience:

- Experience with Typescript
- Experience with clustered and/or distributed systems
- You love crafting beautiful UI & solid UX/DX to solve the users' problems. You have a knack to go one step further to delight the user.
- You love open-source as much as we do! Bonus points if you are an active contributor to the community (speak at conferences and meetups).
